DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

2. Claims 55-58 and 65-67 are rejected under 35 U.S.C. 102(a) as being anticipated by Beske et al. Beske teaches a toner with conductive metal particles. The metal particles can be silver or gold note Col. 2 line 57. The particle size range is 0.3-10 microns note Col. 2 line 59. The toner particle is from 5-10 microns .

Claim Rejections - 35 USC § 103

3. Claims 77-79 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beske et al in view of Inoue et al.. Beskes' toner is outside of the range of sizes of applicants' however Inoue et al. teaches these ranges note Col.9 and that the range of from 5-20 microns can prevent the scattering of a toner inside an image forming apparatus. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the size of the toner as taught in Inoue in the toner size of Beske in providing a toner with improved scattering in an image forming process.
4. Claims 61-63, 69-71, 73-75 and 80-82 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
